What Will the Harvest Be?

Harvesting is pretty well on its way now, in this and adjoining districts. The following is a report from a very reliable source—a man who is on the trail in these districts practically every day—and no doubt summarises fairly accurately the conditions in the sections named:

The wheat fields thru Garvel and south and east to Inga were very good.

Thru Inga the crops will make a good average.

Stony Plain Centre—Light crops, altho more twine has been used than was figured on.

Blueberry, a good crop.
Glory—Hills, also a good crop.

North of Spruce Grove, real good crop.

All of Centre Spruce Grove an average crop.

Golden Spike, an average crop.

Holborn is in plots—some real heavy crops and some light ones. On a general summing up, Holborn has a fair crop. Several wheat fields that have been cut averaged three pounds of 550 foot twine per acre.

Oats and barley have done wonderful since the first rain. Farmers should regard the second crop of oats more than the first, as it will be the best yield, and for the benefit of the straw.

Threshing operations will commence shortly, and when these are completed they will probably show that the average farmer has underestimated the yield of this year's grain crop.

JOHN H. MILLER.

Weekly News Bulletin.

During the first six months of 1922 the municipal hospitals of the province handled 759 more patients than during the first six months of last year. This is an indication of the manner in which the people of the rural districts are utilizing the services offered by these hospitals.

Alberta butter exhibited at five of the large fairs in the West captured 60 per cent of the first prizes offered, and also 4 out of five championships. Exhibits were shown at Edmonton, Calgary, Saskatoon, Brandon, Regina.

Final returns on the Canadian census show that Alberta, led all other provinces in increase in population since the 1911 census. Total population of Canada, 8,788,483. In Alberta the rural population is 62 per cent of the whole.

A total of 129 school fairs is being held in various sections of the Province, in comparison with 89 held in 1921. There has been about 30 per cent increase also in the entries for these fairs, showing the great interest that pupils in the rural districts are taking in the fairs. The Fair at the local school occurs Tues., Sept. 19.

The tour of Alberta and the West planned by the American editors for this week, has been cancelled, owing to railway strike conditions in the States.

A party of colonisers from Scotland has been visiting Alberta with a view to locating land for immigrants from the old country who plan to come here shortly.

LOCAL NEWS.

Monte Miller and wife and W. Fleming and wife, who motored up from Baker, Oregon, were visitors in Stony Saturday night.

Mrs. Nieman and children, who had been visiting for several weeks with relatives in this district, left Friday for their home at Medicine Hat.

Mr. Chas. Witherspoon and family are moving to town, and will occupy apartments over the Kelly Emporium.

Mrs. J. Messenger and children have returned from their visit in Ontario.

Mr. and Mrs. Kelly spent Sunday with friends at Spruce Grove.

Mr. Jess Graham, of Bawlf, formerly a lumber merchant here, was in Stony on Saturday with his family, renewing old friendships.

The Federal grain elevator will open on Friday, Sept. 1, with Mr. Henry Miller in charge. Inspector Judd gave the new building a lookover on Friday.

Mr. R. Swanson, of Edmonton, the Concrete Man, motored out to Stony on Saturday, and looked over the site for the new water tank.

Saturday next sees the last of the special trains to the Beaches.

It can now be officially stated that another reorganization meeting of the local baseball team will be held next week at 2:30. Bring your bats!

Baron & Summerfield have sold their Ford truck to Mr. McLeod, of Spruce Grove.

Game licenses may be procured at The Sun Office.

The next big event is the Stony Plain and District School Fair, scheduled for Tuesday, September 19. The pupils are hard at work on their entries, and it is indefinitely stated this Fair will not be postponed.

A notice from the Townsite Co. infers that the skating rink may have to be removed again when the cold weather comes.

The Weiner Roast party at Edmonton Beach Wednesday Evg. was a very successful affair, a large number of guests being present. The dance in the Pavilion which followed was well patronised, and everyone had a very enjoyable time.

J. W. Stobert of Victoria, B.C., shipped on Friday last, from Stony, a car of dairy cattle and young stuff, bought from: Karl Goetz Sr. 1, H. Schellenberger 2, A. Jespersen 3, Mrs. Zucht 1, Adam Wolf 1, Jake Schoepp 2, F. Horn 1 cow and 8 calves.

Mr. H. Bignall, of Edmonton, shipped 30 head of cattle from Stony on Tuesday, bought from the following: Thos. Scott 3 head, Aug. Burger 12, John Litzberger 5, John Enders 1, Chas. Mills 9.

Mr. A. Meredith of Golden Spike is buying a carload of cattle in this district, and will ship tomorrow.

REMOVAL—Will the gent who "removed" a copy of "The U.F.A." paper from the reading room at the Royal Hotel, kindly return same, as the Prop. needs it?

Don't Squeeze

The failure to organize a Wheat Board to assume full charge of the marketing of this season's grain crop in Western Canada leaves the situation this year much the same as a year ago when a slump in prices took place as soon as the grain began to be placed on the market. The fall in prices was so great as to completely wipe out, in thousands of instances, the farmers' profit and to bring the selling price actually below the cost of production. Notwithstanding a fairly good yield in many parts of the West last year farmers sustained financial loss.

Now with the 1922 wheat crop about to be marketed, and with the best crop since the banner year of 1915 to be sold, it is of the utmost importance that this huge volume of wheat should not be forced on to the market at once, the inevitable result of which would be to cause a "break" in prices that would be disastrous and spell ruin to many people.

But, in the absence of a Wheat Board, is it possible to check and control the marketing of grain by tens of thousands of individual farmers? These farmers have contracted debts they must pay and are anxious to pay. The Fall and early Winter months, following the harvest, is the period for the liquidation of liabilities. Banks, mortgage companies, implement companies, merchants and individual creditors all expect and call on the farmer to "pay up" at this time and each and all usually proceed with measures to "collect." The wholesaler and jobber who has extended credit to merchants on the strength of the credit the merchant has given to farmers makes demand for his money, thus leaving the merchant no option but to press the farmer. And the wholesaler is forced to do this, because the manufacturer is calling upon him to retire his notes. And back of the manufacturer is the Bank which advanced large loans to enable him to keep his factory busy and his men employed during the season when "little ready money" was coming in. The Banks, too, have made advances not only to the manufacturers, but all down the line to wholesalers, jobbers, merchants and farmers, and have financed mortgage and other companies during a period when they could not collect even interest in many cases not to mention principal sums.

Everybody will recognize, of course, that the Banks cannot go on indefinitely advancing money on loan unless such loans are repaid and periodically there is a general liquidation of outstanding liabilities. Only so can Banks function properly, the interests of depositors be safeguarded, and the financial stability of the country be maintained.

While fully realizing these things there is a factor in the present situation that must be taken into account if irreparable loss is not to be inflicted, not on the farmer alone, but upon every national interest, the Banks and other large financial institutions not excepted.

This season's Western crop should be a debt reducing crop. Rightly handled it will accomplish that purpose in large measure. The fact must be appreciated, however, that one good crop will not offset the liabilities incurred during four or five years of poor crops or no crops at all. And if the pressure to secure collection of debts in all quarters is so great as to compel farmers to market their grain as rapidly as it is threshed, the market will be so glutted that prices will fall below a figure where any profit is left for the farmer. If the farmer derives no profit from his year's labor, and but barely succeeds in covering the costs of production, there will be nothing wherewith to reduce his present burden of debt.

If because of shortsightedness in attempts at debt collection wheat is forced on the market beyond the ability of the market to absorb and a bad break in prices results, the farmers' profits will disappear and with the disappearance of those profits his ability to pay his debts. Failure on the part of the farmer to pay will react immediately on merchant, wholesaler, manufacturer and Bank, and ultimately on the nation as a whole.

It, therefore, is not in the interests of the farmer alone that every effort should be made, and every device provided, to render unnecessary the dumping of the crop on the market immediately following threshing. It is as much in the interest of the Eastern manufacturer and financier as it is in the interest of the Western farmer that what prices be maintained. It is likewise in the interest of the city artisan and laborer. Cheap wheat might result in a slight lowering in the cost of bread, but a few cents less for bread would not compensate for loss of employment due to a slowing up or shutting down of industrial plants and other works caused by financial stringency.

On the other hand, the gradual marketing of wheat, the maintenance of fair prices, and consequent profit to the farmer will enable the latter to pay a portion of his accumulated debts and thus ease the financial situation all along the line and operate to restore confidence and re-establish credit.

Natural History

"I am told you went in for speculation on the Stock Exchange lately," said one tradesman to another. "Were you a bull or a bear?"
"Neither. I was an ass!" replied the other.

Letting Him Know

"Would you like to take a nice long walk?" she asked.
"Why, I'd love to," replied the young man caller joyously.
"Well, don't let me detain you," she said sweetly.

What if Nature Struck

What a jolly good thing it is that Nature does not go on strike, but goes on working all the time. Nice mess we should be in if she did. But what an example the dear kind old lady is—Kingsion Standard.

OVERWORKED NERVES

The Most Successful Treatment is

Through the Blood
The early stages of nervous debility are noted by restlessness and irritability in which the victims seem to be oppressed by their nerves. As the trouble advances, common symptoms are a tired feeling; weakness in the knees and ankles; headaches, backaches and sleeplessness. The matter requires immediate attention, for nothing but suitable treatment will prevent a complete breakdown.

The nervous system governs the whole body, controlling heart, lungs, digestion and brain, so that it is not surprising that nervous disturbances cause acute distress. For troubles of this kind Dr. Williams' Pink Pills succeed when other treatment fails, for these pills make new blood, enriched with the elements on which the nerves thrive, and in this way reach the root of the trouble. In proof of this is the statement of Mrs. Dockrill, Stratford, Ont., who says:—"My daughter, Matilda, was suffering from nervous debility, and the usual remedies did not seem to help her. I was advised by a friend to give Dr. Williams' Pink Pills a trial, and soon we found they were doing her a great deal of good. She complained of pains in the stomach, and a severe fluttering of the heart, with a general weakness. Upon the use of these pills she continued to gain, and I believe they have saved her from going into a decline."

You can get these Pills from any medicine dealer or by mail at 50 cents a box of six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Minard's Liniment used by Physicians

Mt. Everest Named After Englishman

British Official Was Head of Survey Department in India

It is surprising to learn that the man whose name was given to the highest mountain in the world lived so recently that his son is still alive.

One is apt to think of the names of places as they were of immemorial antiquity. Yet it was only in 1856 that this mountain received its name; it was called after a British official in India who afterwards became Sir George Everest. It was called in Tibetan, the language of the district in which it lies, Jomo-Kang-Kar, or Chomo-lungma, no one quite knew which.

Sir George Everest was head of the Indian survey, a department concerned with mapping the whole country. He was so deeply interested in his work that, when he was once on a holiday at the Cape, he examined into the survey of that colony as it was then, and discovered mistakes which made it necessary to make a fresh survey.

Asiatic Yak at Wainwright

A number of Asiatic yaks have been added to the animal herds at the National Park at Wainwright, Alberta. It is expected they will be crossed with the buffalo and produce a useful hybrid, an experiment that will be watched with interest by zoologists.

W. N. U. 1435

How Does This Strike Your Fancy?

Favorably, I am sure. For who is the woman that would pass this costume by without an exclamation of approval? She would be mighty hard to find. It is like a gorgeous orange and white butterfly. Heavy crepe is material of which it is fashioned. It is a costume that is ideal for the broadwalk.

Gentle Hint

"Physical culture, father, is perfectly lovely!" exclaimed an enthusiastic young miss just home from college. "Look! To develop the arms I grasp this rod in both hands and move it slowly from right to left."

"Well, well," replied dad admiringly, "what won't science discover next? Why, if that rod had straw on the other end you'd be sweeping!"
—American Legion Weekly.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

Comfort

"Carry the news to my wife," gasped the injured man. "Tell her I am fatally hurt, but say something comforting to her."
"I will," said the policeman. "I'll tell her you had the right of way." Detroit Free Press.

Its Quality Sets It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds and various inflammatory pains its record is beyond reproach.

Giant World Bank Proposed

A plan for an international bank with a capital of \$2,400,000,000, which would revolutionize the methods of conducting international commercial transactions, was advanced by Senator Hitchcock, Nebraska, in a speech before the mid-summer convention of the National Retail Dry Goods Association at Grand Central Palace, New York. Under Senator Hitchcock's proposal, which startled his hearers, paper issued by the projected bank would be substituted for gold as the basis of international credit.

Ask for Minard's and take no other

Something to Do

A colored pastor announced to his congregation the following subject: "Brethren and sisters, I've givine to preach a powhful sermon dis mawin'. I've givine to define the undefinable. I've givine to explain the unexplainable, and I've givine to unscrew the unscrewable."

All mothers can put away anxiety regarding their suffering children when they have Mother Grace's Worm Expeller to give relief. Its effects are sure and lasting.

Alberta Population

Statistics show that the urban population in the province of Alberta has grown in twenty years from 18,553 to 222,904, an average increase of about 10,000 a year. During the same period the rural population has been increasing at an average rate of 15,500 a year.

This is the only Aspirin known that Aspirin means Bayer Manufacture, to meet the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

Radioactive Minerals Have Been Located By Investigators In Ontario

The report on the radioactive mineral occurrences of Ontario, just issued by the Dominion Department of Mines, is an encouraging document. Mr. H. V. Ellisworth examined all the places where such minerals occur, or were likely to be found. "As a result of this investigation radioactive minerals have been found in small amount in the majority of the workings visited, extending from Parry Sound, eastward nearly to Kingston. It thus appears that uranium and thorium minerals are of quite common occurrence and widely distributed in the pre-Cambrian rocks of this part of Ontario, although usually present in very small quantities."

The investigator adds to his report much interesting general information on radium. As to the favorable influence of radium in cancer treatment there appears to be no longer any doubt, he says. Its therapeutic use is being continually extended, and includes many other diseases. It is being given many other employments, and owing to the scarcity of ores and the relatively high cost of mining and extraction it does not appear likely that the price of radium will decline, but rather otherwise. The current price may be roughly stated as from \$3,000,000 to \$5,000,000 an ounce. The total world's production was estimated up to last year as 155 grams, or about five ounces. Of this the United States produced 115 grams.

All the finds of radioactive minerals in Ontario, with the exception of a local locality on Lake Superior, have been in the areas of Pre-Cambrian rocks south of the French and Ottawa Rivers, and west of a line between Ottawa and Kingston.

Mr. Ellisworth notes that the most important radioactive minerals in Ontario are uraninite and exsultite-polyxene. They contain uranium or thorium or both, and are mostly black or brown and rather heavy. Uraninite may contain 70 to 80 per cent. uranium oxide besides thorium, lead and rare earths. Exsultite may contain up to 10 or 15 per cent. of uranium oxide with large amounts of titanium, tantalum, columbian and rare earths. "A little thorium is usually present. It is observed that it is not correct to call uraninite, as is usually done, pitchblende. They are quite distinct in several senses. Radioactive minerals are rarely, if ever, seen on weathered surfaces, and can only be found by opening up the rock. They do not attract a compass needle."

The first discovery of uraninite near Parry Sound was made in February, 1921. This occurrence of radium-bearing minerals, as well as all others in Ontario, is of an entirely different type, both geologically and mineralogically, from the deposits being worked in Colorado for the radium supply of the United States. The Ontario radioactive minerals are richer in radium than the Colorado carbonate. It is gathered from the report that there are good possibilities of deposits of variable extent being developed, but the radium will be recovered most successfully as a by-product.

To Help Farmers Market Potatoes

Investigate By-Products to Facilitate Sale of Second Grade Tubers in Alberta

Howard Stutchbury, coal trade commissioner of the province, has been authorized by the Alberta government to make a thorough investigation of potato by-products, in order that assistance may be given the farmers in disposing of the second grade and cull potatoes. "The potato growers feel that the real success of their industry depends on an outlet for the lower grades," Premier Greenfield is deeply interested in the new project.

Chinese Girl's Victory

When a Chinese girl, aged 12, wins a prize as the best cook in a Manhattan school, one merely recalls that China cooks well as well as popular on the Pacific Coast. But when the same child comes out first in an essay on American history with a hundred competitors, it is necessary to sit up and take notice. Brooklyn Eagle.

Moving Towards Prosperity

Spending Money Constructively to Improve Business Conditions

A great deal is being said at the present time about less saving and more spending in order to make the wheels of industry revolve a little faster.

Merely spending money with no other thought in view than assisting business will have no far-reaching beneficial effect. It is true that too much hoarding hurts business and it is true also that merely spending money for the purpose of keeping business on the go is a false doctrine and will not work out in the long run.

There are many ways in which money can be spent that will help the business situation. The nation needs more buildings, more homes, more railroad facilities, more roads, more wharves. Money spent for purposes of this kind will prove of substantial benefit.

The farmer who spends money in draining, clearing or fertilizing his land, thereby making it more productive and valuable, is spending constructively, and the entire business world to some extent will be benefited. But if he spends the same amount of money in things that he does not need or which have no practical value he would not be doing the business' situation any substantial good.—Regina Post.

The largest watch ever built was manufactured by a Pennsylvania firm. It is 19 and one-half inches in diameter.

Torpedo Plane May Prove A Real Danger To The Modern Battleship

There is something fascinating in the idea that a great battleship can be destroyed by a small machine as an aeroplane. And in England a burning controversy rages as to what will happen with a slim, 100-mile-an-hour torpedo-carrying aeroplane rushes in low over the water to launch its deadly missile, which, if it should actually reach its target, would seriously cripple the largest battleship. A writer in the London Graphic imagines this air attack:

The fleet or torpedo-planes has been waiting in its aerodromes on the surface of its harbor, according as the planes are shot with wheels or floats, waiting until the aerial scouts have located the enemy battle-fleet and reported its pace and direction. Then away go the planes, mounting slowly and steadily to a height which renders them free from hostile anti-aircraft fire, manoeuvring for a position of attack. They stay in divisions, keeping accurate station, "just like ships at sea." The final wireless reports come in from the scouts, who have been dogging the heels of the battle-fleet, all ready, and the game can begin. If the attack can come down wind, so much more rapid will it be, and if it can be delivered from out of the eye of the sun, so much worse will be the aim of the enemy's gunners. The scouts, at a given signal, put down a smoke screen, dropping fireballs upon the water and to windward of the target, screening the planes from the battleships, but not obscuring the view from above. The torpedo-planes gain the desired position—under cover of the screen, and then down they swoop, like after line, each in turn, fattening out over the water at a height of thirty feet, to discharge their torpedoes, and at some four or five hundred yards from the battleships. The pace is so terrific that there is almost a sense of relief that the plane has not dived head-first into the sea. The torpedoes drop with a splash, full length into the sea. They do not dive gracefully, and it hardly seems a second before the mechanism is set in action and the torpedo darts forward, leaving behind it the tell-tale track, leaving behind the planes are still half-obscured in the smoke, while the outline of the battleship is easy to discern from the plane.

Once the torpedo is discharged, the planes seem literally to dance and leap with joy at having discharged the dead weight they have been carrying, and, twisting and turning, they disappear, each one for itself and as best it can, with a final swirl of machine gun fire at the battleship's bridge, or a bomb or two at the gunners below. Perhaps the attack has commenced with a feint by a few planes upon one flank, and when all eyes are straining that way, in comes the real attack upon the other flank. The big ships turn towards the coming torpedoes, trying to evade them by washing them aside, and presenting less of a target as they incline their flanks to the direction of the torpedoes. But they answer their helms slowly, and the torpedo has not far to go. The noise of the guns and machine-guns, the roar of the propellers, the smoke and the suddenness of the attack will tend to upset the gunner's nerves. He will miss. He will bombard his own ships. How many partridges go safely past even the best of shots in a drive? The battleship is useless, say the advocates of the aeroplane.

But there is another side to the question. The battle-fleet, which the torpedo-planes are to attack, must first expose itself within their radius of action, by no means unlimited. Big battleships avoid narrow waters. And then, when the battleship is accompanied by aircraft carriers, from the deck of which fighting planes can go up, and to which they can descend when their petrol is running short. Flying-planes, also, as times goes on, will rise from the sea, and the torpedo-planes will find themselves attacked by their own kind, unencumbered by the dead weight of a torpedo. The manoeuvring for position, the keeping of station, the timing of the attack will not be unaltered. And, outside the battleships, move the smaller craft, inconveniently placed at the point where the planes would like to flatten out. The battle-fleet will continually be altering direction, zig-zagging in fact, and the smoke screen may even allow of an unnoticed change of direction. For a smoke screen is often a two-edged weapon, and it is possible to obscure one's own view in attempting to blind one's adversary. The weather may be bad, there may be low-lying clouds, or mist and haze may close down in a moment, after the torpedo-planes have started. It is possible that much big sailing as a battle-fleet may evade detection completely. There are gales which preclude all flying over the sea, and which hardly affect the surface-going battleship.

Only careful experiment can really draw the balance between the opposing points of view.

Sweden May Build Navy
A parliamentary commission supported by navy experts has proposed for the Swedish navy a building programme for the next ten years of four fast armored cruisers, 12 destroyers, six big torpedo boats, three mine layers, 22 submarine chasers and a number of smaller craft. The armored cruisers are to be 5,000 tons each with a speed of 30 knots, with eight 21 centimeter and six 12 centimeter guns. As the proposal is based on preliminary consideration there is a probability of it being passed during the coming sessions of Parliament.

PEARL, who had changed Pimble, the End-of-the-Earth Brownie, into a sea creature, was ever so pleased at the interest he showed in it. "You seem to wish to have everything explained to you!" she laughed teasingly.

"I always like things explained," he answered seriously, "because there is nothing in the world I enjoy so much as learning about new things." Just at that instant a glorious gray fish swam past them. Each of its scales shined on another, and in the slanting sun rays it seemed the water, this fish appeared more than beautiful.

"My goodness!" exclaimed Pimble, "what is that? It looks like some swimming Jew!"

"Nothing more or less than a Salmon," laughed Pearl. "A Salmon that humans so love to eat."

"Will you tell me more about it?" "Certainly," she answered. "Aside from the fact that its flesh is pink and very delicious (which is almost the only thing concerning a Salmon that interests humans), there is a lot concerning Salmon that is more than amusing. For instance, at three different points of the Salmon's life, it is absolutely different, both in appearance and habits from what it was or will be in its other stages."

"When Salmon first emerges from the eggs they are tiny helpless things and for the first weeks of life they are careful always to hide, they also carry about with them part of the egg from which hatched, as it serves as food. At the end of about fifty days they begin to have a fish shape; but not before. During this first stage the young Salmon is called a 'Parr'. During their parried they remain in fresh river waters and only venture to sea when they have become 'Smolts'. (A smolt is a young Salmon during its second stage of development). For two months the Smolt stays in the ocean, during which time it grows most amazingly. These two months over, it returns to its native river and is now called a 'Grilse'."

"Why does it go back to the river?" asked Pimble, who was hugely interested.

"To lay eggs," Pearl answered. "There is nothing strange in that; but," she added, "it does seem more than strange, that the Grilse who has the entire life of its home never loses itself too much to remember how to find its native river. It is as though a weirdly powerful memory or instinct dragged it back to the spot of its birth."

"Just what is 'instinct'?" asked Pimble. "Instinct," Pimble's eyes were wide with thought. "Can you tell me?"

"As far as I know I'll tell you, but though we all, each and every one of us, FEEL what it is, it is an extremely difficult thing to explain." The Mermaid swam alongside of Pimble for several minutes in silence before she answered. She was thinking. "I suppose," she then began, "the only way to speak of instinct is to call it a God-given knowledge that is bestowed on all living creatures for their own protection. . . . a knowledge that God has whispered to their life and how He wants them to live their lives. We have to call this undeniable fact something . . . so we call it 'instinct'. There is no doubt at all that it is instinct alone that guides a Salmon from the whole immense tract of ocean water back to its very own river."

"There are two Japans. Just as there are two of every other nation. One is narrow and belligerent in hacking one's way with a sword. The other is broad and believes in co-operation between nations. The problem for outsiders is always to hold out the right hand of fellowship to the liberals. The Washington conference, with its cordial attitude toward the yellow races, has in this short time helped to put the liberals into power. . . . of the same policy will keep them there, for the real source of the yellow peril is in white Jingles.—Boston Globe.

You May Have Kidney Trouble and Not Know It

If your back aches and you suffer from dragging pains, it is an evidence your kidneys may not be acting just right. What you need is a course with Dr. Hamilton's Pills. They contain both Mandrake and Butterick and act very beneficially upon the liver and kidneys. I was bothered by a great deal with my kidneys, but got quick relief from Dr. Hamilton's Pills. My trouble manifested itself in a pain in the back and by constant headache. I quickly recovered after using a few boxes of Dr. Hamilton's Pills. They brought me health, strength and vigor. Sold everywhere, 25c. or The Cataractage Co., Montreal.

(Continued)
Bar B Ranch, Carbon City,
July 21st, 1921.

What a wretched st of the blues I must have had on Wednesday! Fortunately for the retention of my self-respect, I have ever since been too busy to be dismal, the days have not been half long enough to hold all the new impressions.

I woke bright and early Thursday morning, feeling fit as if, after all, there might be worse places than Carbon City. And when I had eaten my breakfast and written to Mother and Mrs. Arnold and made a trial of my skill on the "Boo-bie" piano, I felt that there might be very much worse places. By the way, Mrs. Bingham tells me that the sleeping-diplomat is a well-educated but rather dissipated young Englishman, a "rental man," "Faget by name." He is our nearest neighbour, and comes out to Mr. Bingham for advice regarding the management of his ranch. The advice, Mrs. Bingham adds, is never followed, and he is in a fair way to lose the money he has foolishly invested in an unnecessarily expensive outfit.

If what follows is not proof positive of my innate stupidity and my complete disregard of the laws of coincidence, then I am no judge of such matters.

Mrs. Bingham, Sunny, and I sat in the parlour after breakfast, waiting for Mr. Bingham to come and tell us when he would be ready to leave for the ranch. I was reading when I heard Mr. Bingham's voice from the hall, and I did not look up until Sunny shouted, "Oh, Mother, that's Uncle Don talking!" Then I looked up, just in time to see him rush through the door, dropping her beloved doll as she ran. In a moment

she returned, perched proudly on the shoulder of Don Livingstone!

The thought of the shilling I nearly gave him filled my mind so completely that I scarcely heard Mrs. Bingham as she introduced him. Of course he is not Mrs. Bingham's brother, as I had supposed from Sunny's constant chatter about "Uncle Don," but Mr. Bingham's partner, and merely adopted by Sunny as I am.

Due, no doubt, to the fact that he had the upper hand, Mr. Livingstone did not seem to be the least bit concerned, and there was a noticeable twinkle in his eye as he asked me if I were my first visit to the West. Humiliating as is the thought, I am forced to believe that his apparent embarrassment on that former occasion was not embarrassment at all, but well-concealed amusement. I have a presentiment that it is going to need discipline; I do not approve of calm politeness accompanied by a twinkle. I was very cool and very dignified, slightly bored in fact, if one were to judge by my deportment. And I suppose Mary knew the time when "Uncle Don" was. Revenge will be sweet.

At half-past nine we left the town. The horses that came prancing up to the hotel door must have been closely related to those that tried to climb the elevator at Elba, but Sunny was delighted to see them, so I concluded that they could not be quite so murderous as they looked.

"Mother, can't I please sit in the front seat with Uncle Don?" coaxed Sunny. "And you come, too, Auntie Elnor, so's I can tell you just as soon as we see the house." I wonder if David will come to meet me. Do you think he will, Uncle Don?"

"Sure he will," replied that self-possessed young man in answer to the last question. "The promised me faithfully last night that he would wait for us at the first gate." Then he added, "Perhaps Auntie Elnor would rather sit with her back to the horse. English people are like that, you know."

The cheek of him. "Thank you," I said freely. "Auntie Elnor" (and didn't I emphasize it!) would much rather stay with Mrs. Bingham."

Going in a south-westerly direction from the town, we followed the well-worn trail mile after mile over the plain and through valley. Once we frightened a bunch of sheep and their litter of woolly cubs; another time a cynical-looking eagle flattered up ahead of us. In one valley we saw in the distance a large flock of sheep watched over by a solitary herdman.

In one valley I noticed that the "cut-bank" were streaked with black, and Mr. Bingham, in response to my remark regarding the strange marbled appearance, told me that the black streaks were outcroppings of shale that could be pointed to a place farther along the canyon where a mine-shaft could be dimly seen. A "cut-bank" is, presumably, a place where some prehistoric glacier or other torrent has torn away the face of a hill and left a cleanly cut bank as steep and smooth as the side of a house—an excellent place in which to study geological strata.

When I finally saw a house, ten miles out of Carbon City, I felt as I am sure Columbus must have felt when he sighted land. This house, by the way, is the only one between Carbon City and the Bar B.

"Is that a ranch?" I asked.

"No," replied Mrs. Bingham with a strange emphasis. "That is a farm. We'll call them that for I have some books and magazines for Mrs. Carroll."

"A farm?" I repeated. "I did not know that there were farms in this part of the country."

"There should be," Mrs. Bingham answered. And then she told me the history of the Carrolls. They are English of good family, and used to all the refinements if not the luxuries of life. But two years ago a "land shark," to use Mrs. Bingham's phrase, combined business and pleasure in a visit to the Old Country, and while there persuaded Mr. Carroll to sink all his capital in this so-called farm. He enlarged upon the cheapness of the land and the healthfulness of the warm Alberta winters, but he omitted all mention of the fact that two-thirds of the land was houlding and that the rest was a bare, er-strewn river bottom, and that an exceedingly light rainfall made farming next to impossible. And he did not tell them that the "good house" was a two-roomed shack, with no floor and a mud roof.

It is easy to say that Mr. Carroll should have made enquiries into the record of the man with whom he was dealing, but he is apparently very impractical—at any rate, they are here, too proud to ask or accept assistance, and absolutely penniless except for a small party belonging to Mrs. Carroll. Of course, as soon as they found that they had been tricked they tried to cancel the agreement and to have their payments refunded, but the agent had "kipped the country" and has not been heard of since.

It made me feel positively stretched to the door as we drove up, and invited us to go to the fact that the miserable shack had been a mansion. But she seemed to be relieved when Mrs. Bingham said that we would not get out of the wagon, as we had only few minutes to stay. Then Mrs. Bingham introduced me, saying that I was from England and that I was to spend the winter at the ranch "From England," Mrs. Carroll repeated, "and I hope I shall never again see an expression of sadness such as crossed her face as she spoke. Mr.

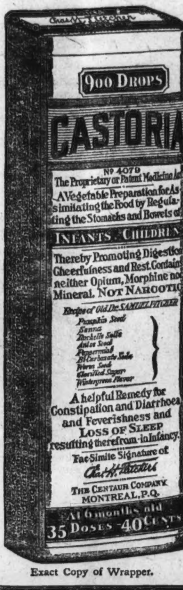

Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, toothbrush or sponge.

Children Cry For Fletcher's CASTORIA

Your Friend, the Physician.

The history of all medicines carries with it the story of battles against popular beliefs: fights against prejudice: even differences of opinion among scientists and men devoting their lives to research work; laboring always for the betterment of mankind. This information is at the hand of all physicians. He is with you at a moments call, he is the trouble trifling or great. He is your friend, your household counselor. He is the one to whom you can always look for advice even though it might not be a case of sickness. He is not just a doctor. He is a student to his last and final call. His patients are his family and to lose one is little less than losing one of his own flesh and blood.

Believe him when he tells you—as he will—that Fletcher's Castoria has never harmed the littlest babe, and that it is a good thing to keep in the house. He knows.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher

THE CENTAUR COMPANY, NEW YORK CITY.

Carroll did not appear. I have formed an opinion, not so much from what Mrs. Bingham said as from what the left said, that he has allowed himself to brood over his bad fortune, and that he could only be persuaded to exert himself matters might be greatly improved. They have one child, a little boy of about Sunny's age.

In ten minutes we "hit the trail" again, and again drove mile after mile over plain and through valley. I was beginning to feel as if my back were six inches too long, and to speculate upon how many layers of skin would peel off my nose, when suddenly Sunny called out, "Shut your eyes, Auntie Elnor, and don't open them until I tell you to."

I closed my eyes obediently, glad enough to rest them from the blazing sun. Promptly came the second order.

"Now, Auntie Elnor, look!"

I looked. And far away to the south-west the jagged line of the Rockies broke into the blue of the sky. So far away that their natural colors were hard to discern, they seemed to be made of shimmering steel, and mother-of-pearl, so beautiful in their unexpectedness that I could not speak.

"That big one over there by himself is Old Chief; he belongs to the Yankees, but I just love him," volunteered Sunny.

I looked until my eyes ached, then rested them and looked again. Still I ever tire of looking. I wonder? Need I say that the remainder of our drive was not monotonous?

David was waiting for us at the first gate. Never was a small dog so greatly excited. He wriggled with joy all the way from the tip of his nose to his rudimentary tail, ran around and around the wagon barking like mad, and was only silenced when Mr. Livingstone got out and lifted him to the seat beside Sunny. He is a jolly-looking little dog, with a rakish black spot around one eye, a Cham-belain, and a credit of running on

three legs—"to excite sympathy," Mr. Livingstone explains. It was one o'clock when we reached the house. Lee, the Chinese cook, welcomed us warmly—warmly for an Oriental, I mean—and conducted us to the dining-room, where, as the Suffolk Argus would say, a sumptuous repast awaited us. If my first farm proves a failure, I shall go into the newspaper business.

(To be continued)

Stop the Cough—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Farming Second Industry in B.C.

Production of the Forest Leads With a Good Margin

Agriculture, with a production of \$59,742,994, was the second industry in British Columbia, in 1921, according to a report issued by Hon. E. Barrow, Minister of Agriculture. Production shows a shrinkage of 10 per cent, in value from the preceding year, owing to decreased values. Forest products lead the province, with a value of \$64,970,000, while mineral production had a value of \$28,066,441 for the same period. The fruit crop for 1921 was the largest on record, its value to the producers being \$6,654,850, an increase of 15 per cent, over the value of the 1920 crop. In dairy products there was an increase of \$46,558 pounds of butter while egg production increased by 300,677 dozen.

The area planted to fodder crops was 6,555 acres more than in 1920, but the total value of fodder crops was \$4,090,432 less, owing to the lower value of the hay crop. The honey production was 308,074 pounds, valued at \$89,631, against \$67,703 for the previous year.

Saskatchewan's Agricultural Production

Total Value of Production for 1921 Was \$444,937,073

The total value of agricultural production in Saskatchewan in 1921 was \$444,937,073, made up of grain crops \$210,732,073; field crops \$14,965,000; farm products \$32,514,436, and livestock \$186,326,254. Livestock in 1921 set a record in number and value, being 1,179,289 horses; 1,562,222 cattle; 188,021 sheep; and 432,776 swine, in the province. The total amount of wheat produced in the province in 1921 was 201,347,483 bushels from 13-55,678 acres, the greatest of any season in the province's history with the single exception of 1915.

Husband and Wife Nearly Dead With CHOLERA

Very chief symptoms of cholera are vomiting and purging occur either simultaneously or alternately, and are usually sudden and very violent, and the matter ejected from the stomach has a bilious appearance and a nasty bitter taste.

On the first symptoms appearing, Dr. Fowler's Extract of Wild Strawberry should be taken, and the trouble checked before it becomes serious. Mrs. Isaac Smith, Campbellton, N.B., writes:—"We have been using Dr. Fowler's Extract of Wild Strawberry for cholera. My husband and I were pretty nearly dead with it until we started to use your medicine, and thanks to it, we have found great relief, and are recommending it to all our friends." "77 years' reputation stands behind 'Dr. Fowler's' therefore you are not experimenting with some new and untried remedy when you get it. Price, 50c bottle; put up only by The T. M. Blackburn Co., Limited, Toronto, Ont.

Headache

Recurring headaches usually come from an exhaustion of the nervous system, and they do not disappear until the vigor of the nerve cells is restored by such up-building treatment as Dr. Chase's Nerve Food.

Temporary relief by use of powders is often obtained at an enormous expense to the nervous system and the general health.

Get the nerves right and the headaches will not return.

Mrs. W. J. Pearce, Nunn St., Cobourg, Ont., writes:

"My system became run-down and I suffered greatly with pain in my head. This was so severe that I would have to lie a clock tightly about my head so that I could get my work done. A friend advised me to use Dr. Chase's Nerve Food, and after taking it a few bottles I found quite an improvement. My condition continued to improve until I had taken about seven boxes, and they strengthened and built up my system splendidly, completely relieving the pain in my head."

Dr. Chase's Nerve Food, 50c a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

National Loss Is Suffered By Ireland In Death Of Collins

LONDON.—The death of Michael Collins, who has fallen in actual combat with the rebels as one of the first victims of the substitute plan of guerrilla warfare for organized resistance to Provisional Government, has impressed the British public far more than did even the death of Arthur Griffith, while the circumstances of his death, fighting against desperate odds in a carefully arranged ambush during the course of an inspection of his troops position around Cork, adds to the halo surrounding his lamented death.

His daring and his personal attractiveness, combined with his adventurous career and his reputation as a courageous fighter, as well as a prudent administrator, helped to give him prominence and importance in the public eye, which was not shared to anything like the same extent by Griffith, who, really was little known to the British people, and whose retiring nature did not lend itself to public demonstrations.

The British press is filled with tributes, personal sketches, and of the man's death escapes of the command-in-chief, together with tributes to his loyalty in carrying out the conditions of the treaty he signed with Great Britain. Prominent men at home and abroad, from the Prime Minister down, hastened to pay tributes of condolence and respect.

When Arthur Griffith died, it was the subject of general comment that his life's work was virtually accomplished and his ideals achieved. With Michael Collins, his work was still to do, and perhaps the question most exercising the British public is what will follow upon the tragic disappearance of the two most important Irish Free State leaders. It is pointed out that of the five principals signing the Anglo-Irish treaty, only one now remains in the Free State Government, Eamon J. Duggan. Of the other signatories, Griffith and Collins are dead, George G. O'Duffy resigned because he disapproved the draft of the constitution, while Richard Barton long since dropped out of the Government.

Mr. Lloyd George issued the following statement for publication: "I am inexpressibly sad at the news of the death of this gallant young Irishman. He fell a victim to a treacherous blow, delivered when he was engaged in endeavoring to restore order and liberty to his country, which stands sadly in need of it. His engaging personality won friendship even amongst those who were his enemies, and to all who met him the news of his death comes as a personal sorrow. "I sincerely hope his death will be the last episode in this dark chapter of Irish history and that a new and brighter story will henceforth be written in the life of that unfortunate land."

Lord Chancellor Birkenhead, Winston Churchill and Viscount Fitzalan were among the men prominent in British public life who have sent messages to Mr. Cosgrave, sympathizing with the Free State Government in its loss.

According to a Dublin dispatch to the Press Association, General Collins was to have been married this month.

Another Seed Grain Marketing System

Will be Undertaken by Alberta Department of Agriculture

Edmonton.—Making the third marketing system to be established by the administration, marketing of seed grain on an extensive scale and in accordance with a plan seeking to encourage the production of pure seed in Alberta is to be undertaken by the Provincial Department of Agriculture as a result of arrangements completed and which have not received the approval of the Hon. George Hoadley, Minister of Agriculture. The announcement of the new scheme has been made by H. A. Craig, Deputy Minister. It follows the Government's operations in butter and egg marketing.

W. N. U. 1435

To Assist Farmers

Saskatchewan Premier Has Feasible Plan to Prevent Glutting Wheat Market

Regina, Sask.—A concrete suggestion outlining the method which might be adopted by the banks to assist the farmers to market their grain in such a manner as to prevent the glutting of the wheat market and a consequent depression in prices was telegraphed to Hon. W. L. MacKenzie King, by Premier Charles A. Dunning.

Pointing out that the banks stand at the base of the pyramid of credit, Mr. Dunning suggested that "if they could devise means of extending portions of amounts due them from all creditors to enable more gradual liquidation," he feels sure that the effect would be felt through all classes of creditors "down to the farmers and probably prevent slaughter of wheat prices."

Mr. Dunning points out that merchants as well as farmers stand creditors to the banks in considerable sums of money, and his proposal involves a gradual liquidation of their bank indebtedness by all creditors, thus eliminating the necessity for merchants and other crowding the farmers for cash payments early in the fall.

The telegram to Premier MacKenzie King, follows the receipt by Mr. Dunning of a communication from Sir Frederick Williams-Taylor, representing the Canadian Bankers' Association, in which Sir Frederick announces that the banks will furnish all proper banking accommodation to care for this year's crop, coupled with his personal assurance "that the banks will show the farmers every proper consideration, being deeply interested in the welfare of their customers and the prosperity of your province."

Railway Freight Shed Destroyed by Fire

Loss at Fort William Nearly Two Hundred Thousand Dollars

Fort William, Ont.—No. 3 freight shed of the Canadian Pacific Railway was practically destroyed by fire Aug. 20. The flames were kept from spreading into No. 2 shed which is separated by a fire wall from No. 3. The fire also spread to several box cars in the yard.

No. 2 shed and contents are completely destroyed and between 25 and 30 empty box cars are also a total loss. The shed contained 7,000 bags of cement, 1,000 tons of nails, several hundred tons of binder twine, some iron pipe and a quantity of miscellaneous freight. The bow of the steamer Kenora, which was tied to the dock, was badly scorched before she could be moved from the vicinity of the fire.

No information can be obtained as to where the fire started. Two Italians, who claim that they were the first to give the alarm, state that the shed was on fire when they first saw the flames, but others say that the first blaze originated in one of the box cars standing by the shed and spread to the buildings.

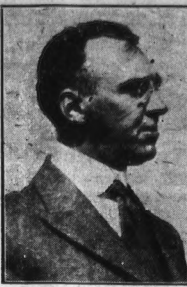

No records of the cost of the burned sheds are available in Fort William, but it is estimated that it could not be replaced for less than \$100,000, and the cars are damaged to the extent of at least another \$25,000. With the contents of the freight sheds the loss in the fire will probably total between \$150,000 and \$200,000.

Soviets May Expel Scientists

Reval, Estonia.—A dispatch received here from Moscow announces the arrest of 200 Russian scientists and writers during the last few days in Moscow, and of 30 in Petrograd. The dispatch says they are accused of being unfriendly to the Soviet Government and that they will be expelled from Russia for various periods.

By making your purchases from your home merchant you are contributing direct to the prosperity of the community in which you live.

WESTERN EDITORS

Says Western

Coal Strike Over

Strike of Alberta Miners Has Been Virtually Settled

Calgary.—The Alberta coal strike was practically settled, when the executive of the miners and the operators came to terms on an agreement which provides:

(1) Reduction of 15 per cent. on the old scale, which will be superceded as soon as 75 per cent. of the operators in United States soft coal fields sign an agreement.

(2) The agreement shall be in effect until March 31 next. The agreement must be submitted to a referendum of the men, but the officials say it is largely a matter of form, as it will be endorsed.

The miners expect to be back in the mines almost immediately.

Both miners and operators admit that the agreement practically means that the men are going back without any reduction, because either 70 per cent. of the operators across the line have either signed up or will be signed up by the end of the week. The agreement, signed accordingly means that the Cleveland agreement has been accepted.

Report Finding Ontario Gold

Sudbury.—What is considered to be one of the most sensational finds of gold ever made in the Sudbury district is on exhibition here. It is a piece of rock about 16 inches in length and eight inches thick, and pure gold is easily visible. It was found a few days ago, about 40 miles north of this town.

Lost in Labrador

Vancouver, B.C.—Miss Marguerite Lindsay disappeared a few days ago from Grenfell Mission, Cartwright, Labrador, and her friends believe that she was drowned, according to a message received here by Mrs. Herbert Drummond, Miss Lindsay's aunt. Details are to follow by letter. Miss Lindsay's father resides in Montreal.

—Philadelphia Ledger

Western Wheat Will Be Shipped In Future Through Canadian Ports

Serious Economic

Situation in Ireland

Destruction by Irregulars Has Completely Disrupted Business

Dublin.—Grave economic conditions have come rapidly in the wake of the policy of destruction of the irregulars in West Ireland. The collapse of some of the bigger business concerns has only been averted, it is declared, by steady support from banks, but the fact that the farmers and others have been unable to pay the interest on their advances for many months is bringing about a position in which the bankers may be compelled to take action.

Business prospects are extremely bad; prices of produce are falling rapidly, and the export trade, upon which the farmers depend, is suffering acutely from the dislocation of traffic caused by the destruction of railways and bridges. Perishable products, such as butter, are spoiling, as there are no facilities for cold storage. Until normal conditions return the output of the creameries must be curtailed.

Riley's Standard

Bearer Arrested

Charged With Theft Man Admits He Was Not Overseas

Toronto.—Charles Gannett, who carried the flag of the hikers when they went on their trek to Ottawa to demand relief for returned men, was arrested on a charge of theft. Sergt. David Hunter, of the 48th Highlanders Regiment, complainant in the case, charged Gannett with theft of a military uniform. Gannett is alleged to have admitted not having been overseas.

Chinese Declare Peace

Leader of South China Faction Says War Is Ended

Peking.—The republican cabinet announced that President Li Yuan-Hung is willing to resign in favor of Sun Yat Sen, deposed head of the South China Government, provided Parliament approves such action.

Sun Yat Sen, leader of the South China faction, announced that peace reigns again between the north and south and that "the war is ended."

Vancouver Millers Lower Flour Prices

Vancouver.—Bringing their product in line with recent declines in the price of wheat, Vancouver millers have reduced the wholesale price of flour by thirty cents a barrel for car-load lots.

OTTAWA.—Following investigations of complaints made to the Department of Trade and Commerce here regarding the grades of grain received in England after shipment from Western Canada via United States ports and the taking up of similar questions with the British grain importers during the visit of Hon. J. A. Robb, Minister of Trade and Commerce, to Britain, it is expected that steps will be taken to try and secure the shipment of a greater percentage of Canadian wheat through Canadian ports than previously.

Occasionally complaints have been received by the department from British importers that grain received by them from Canada was not up to the standard of Canadian grades. Investigation of several complaints was made during the past year and it was found that grain in question had been shipped to the old country through United States ports and that in the trans-shipment at American elevators wheat of inferior quality had become mixed with the Canadian product. This feature was taken up by Mr. Robb while in England and it is understood that some of the British importers made vigorous objections to the present system of exporting. They were satisfied with the Canadian grading system, but claimed that when the grain was not shipped directly through Canadian ports they were not certain that their grain would be equal to the standard grade which they had contracted for.

The outcome of the conference is expected to be a further development of elevator facilities at Canadian ports in order that as much Canadian grain as possible may be shipped direct and there also is a possibility that Canadian exporters, in order to protect the high standard of Canadian breadstuffs in the world markets, may be asked to bond their exports when they are shipped through foreign ports.

Murder Plan In Egypt

One Englishman a Day Until Nationalist Leader Is Returned

Alexandria, Egypt.—The recent attack in this city on Lieutenant-Colonel Arthur Frederick Hamilton Pigott was the sixteenth case in the series of murderous assaults upon British subjects in Egypt. It called again to mind the threat of the nationalists that an Englishman would be shot daily until the return of Said Zagloul Pasha, the Nationalist leader who was deported by the British last December, and it is the latest addition to the extended chain of anti-British political outrages.

Lieutenant-Colonel Pigott, of the Royal Army Pay Corps, was shot and gravely wounded in Kasr el Fadi Street by unknown assailants while walking to his office. He was taken immediately into the house of an Egyptian doctor, M. Abdel Meguid at No. 1 Kasr el Fadi Street, and was given first aid, being afterward transported to the Officers' Hospital at Abbassieh where one of the three bullets, which had hit him was extracted.

Hopes are entertained of his recovery, but his new crime has aroused great indignation among the European population in Egypt.

George Ham Celebrated 75th Birthday

Montreal.—George H. Ham, the veteran raconteur, celebrated his seventy-fifth birthday Aug. 23rd.

He was at his office at the Canadian Pacific Railway Windsor Station, as genial as usual. His seventy-fourth birthday was marked by the publication of his book: "Reminiscences of a Recounteur." Mr. Ham is now preparing another book.

London-Paris Air Express Wrecked

Paris.—Five passengers on a London-Paris airplane narrowly escaped death when the machine crashed at Berck-Plage, about 25 miles south of Boulogne. The mishap was due to engine trouble. Although the machine was smashed, the passengers escaped with minor injuries.

match will blow up the house.

Twice the quantity of flour, mixed
with 4,000 cubic feet of air in a
closed place will, if ignited, gener-
ate enough force to throw 2,500
tons to a height of 100 feet.

Thus, you see, the material out
of which our bread is made is, un-
der suitable circumstances, as dan-
gerous and explosive as gunpowder.
We have read a good deal lately
about the dangers of coal dust but
recent tests have proved that flour
or any kind of grain dust is more
inflammable than coal dust and
correspondingly more liable to ex-
plode.

Schadeck & Barth

Tinsmiths, Stony Plain.

A Concession to Home Investors.

In offering to renew the 5 1/2
per cent Canadian Govern-
ment Bonds maturing Decem-
ber 1st at the same rate of
interest as is carried by the
maturing bonds, and allowing
a bonus of one month's in-
terest, the Minister of Fin-
ance is making a material
concession to the Canadian
investor, as this rate is higher
than was paid on the re-
cent Canadian loan in New
York. The high class of the
security, which is the very
best that can be offered in
Canada, and the liberal rate
of interest, should lead to a
large investment in these Do-
minion bonds. Attention is
directed to the official adver-
tisement giving details.

Olds School of Agriculture.

On October 31st, the doors
of the Olds school swing open
to receive students for the
ninth term. While the pres-
ent season has, in certain dis-
tricts, been unfavorable to the
farmer, reflection on the fact
that only by scientific and
specialised practical training,
can the farm be made to show
a profit under adversity, will
result in many a man sending
his son or daughter to obtain
the education offered by the
Province thru the Schools of
Agriculture. Free courses in
both Agriculture and House-
hold Economics are offered at
the Olds School. Both courses
are complete in themselves,
yet both form the basis for
advanced training in Alberta
University. Accommodation
is provided for students at
nominal rates, and beyond the
cost of living and purchase of
books, the cost of receiving
the course is practically nil.

Game Regulations.

Following are the open seasons
on the game specified—

Deer, Moose, Cariboo—
November 1st to December 1st.

Ducks, Geese—
September 1st to December 1st.

Game (Prairie chicken, Partridge, etc.)

October 1st to November 1st.

Muskrat (North of North Sask-
atchewan River)—
December 1st to 31st.

In the Game Early.

Sixteen hundred boys and 21
134 girls fifteen years of age were
listed as married in 1921, in the
United States, the census bureau
at Washington announced in a
statement presenting a special
analysis of marital statistics. Eighty
two boys and 499 girls of the same
age were recorded as widowed or
divorced.

To Holders of Five Year 5 1/2 per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders
of these bonds who desire to continue their
investment in Dominion of Canada securities the
privilege of exchanging the maturing bonds for new
bonds bearing 5 1/2 per cent interest, payable half yearly,
of either of the following classes:—

(a) Five year bonds, dated 1st November,
1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November,
1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st
December, 1922, the new bonds will commence to earn
interest from 1st November, 1922, GIVING A BONUS
OF A FULL MONTH'S INTEREST TO THOSE
AVAILING THEMSELVES OF THE CONVERSION
PRIVILEGE.

This offer is made to holders of the maturing bonds
and is not open to other investors. The bonds to be
issued under this proposal will be substantially of the
same character as those which are maturing, except
that the exemption from taxation does not apply to the
new issue.

Holders of the maturing bonds who wish to avail
themselves of this conversion privilege should take
their bonds AS EARLY AS POSSIBLE, BUT NOT
LATER THAN SEPTEMBER 30th, to a Branch of
any Chartered Bank in Canada and receive in exchange
an official receipt for the bonds surrendered, containing
an undertaking to deliver the corresponding bonds of
the new issue.

Holders of maturing fully registered bonds, interest
payable by cheque from Ottawa, will receive their
December 1st interest cheque as usual. Holders of
coupon bonds will detach and retain the last unmaturing
coupon before surrendering the bond itself for conversion
purposes.

The surrendered bonds will be forwarded by banks
to the Minister of Finance at Ottawa, where they will
be exchanged for bonds of the new issue, in fully
registered, or coupon registered or coupon bearer form
carrying interest payable 1st May and 1st November
of each year of the duration of the loan, the first interest
payment accruing and payable 1st May, 1923. Bonds
of the new issue will be sent to the banks for
delivery immediately after the receipt of the surrendered
bonds.

The bonds of the maturing issue which are not
converted under this proposal will be paid off in cash on
the 1st December, 1922.

W. S. FIELDING,

Minister of Finance.

WORLD HAPPENINGS
BRIEFLY TOLD

Fire of unknown origin totally destroyed the roundhouse and machine shops of the Eastern British Columbia Railway at Corbin, with an estimated loss of \$75,000.

Arthur O'Brien, President of the Gaelic League at London, who was arrested Aug. 2 by the Free State authorities, has been released from the Maryborough Barracks.

Ten persons were killed and fifty wounded during Polish aerial manoeuvres at Poznan, when an aviator accidentally dropped a bomb among 800 spectators.

Seven workmen were killed and one hundred injured at Gravesend, Eng., when a train crashed into the rear of their work train, which was standing at the station.

J. B. Craig and J. A. Richardson have been elected President and Vice President respectively of the Winnipeg Grain Exchange. Dr. Robert Magill was re-elected secretary treasurer.

It is estimated that, in the process of consolidating the Militia Department, the Air Force and the Naval Service Department, Ottawa, upwards of 1,000 employees have been deprived of their positions.

Owing to the shortage of coal the Ford Motor Company's Highland Park plant at Detroit, has been equipped with oil burners. The change was made without loss of time to any of the 42,000 employees.

Reports to the health section of the League of Nations show that in the Kharkov district of Russia, early this year people were dying at the rate of 40,000 a month, or a mortality of 600 in every 1,000. Between March 1 and 20, 125,000 persons died of hunger.

An All-Metal Aeroplane

Airships Made of Aluminum May Supplant Earlier Types

There was recently completed in Great Britain the first aeroplane to be made wholly of metal. The advantages of doing away with wood and other combustible material need not be emphasized; and the all-metal aeroplane gives promise of supplying all the earlier forms. A special alloy of aluminum is used in its construction, and the Government is at present engaged in making very elaborate tests of the strength of every part. Special attention is being given to the risks of corrosion with the metal employed and investigations on this point are being carried out in the Department of Scientific and Industrial Research. So much depends on this new type of aeroplane that although the first flying tests have been very satisfactory the Government prefers to regard the model as an experiment and to suspend judgment until a most exhaustive examination over a long period is completed.

Corns Between the Toes
Painlessly Removed

A real, sure, dependable remedy that has been lifting out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

In an English town, not long ago, a woman won a competition by lighting 103 candles with one ordinary wooden safety match.

Keep Minard's Liniment in the house

A Valuable Gift

Twelve mountain sheep were recently presented to the United States Bureau of Biological Survey by the Canadian National Parks Branch. They were liberated on the Montana National Bison Range. The sheep were secured from the Rocky Mountain Park, and arrived at their destination in excellent condition. Their future will be watched with a great deal of interest by big game enthusiasts.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Shipping Wheat Via Vancouver

According to a prominent Vancouver grain dealer the movement of wheat through Vancouver will at least equal last year's total. He has just returned from a business trip through Alberta and Manitoba. Chinese and Japanese inquiries have become active during the past ten days and the first shipments will be in late October or early November.

Soothes Irritable Throat,
Relieves Bronchitis Quickly

No Drugs to Take, No Medicine to Upset the Stomach, Just Breathe "Catarrhozone"

Count ten—a bit cold is relieved by Catarrhozone—wait one minute and you will feel its soothing influence on a more irritated throat. No failure with "Catarrhozone"—it is effective because you can breathe a healing vapor to the very spot that needs help. The big thing to remember about Catarrhozone is this, you just breathe a healing vapor that is full of the purest balsams, kills all germs, gives nature a chance to completely destroy the disease. Colds and throat troubles can't last if the pure healing vapor of Catarrhozone is breathed. Catarrh will disappear, bronchitis attacks will cease, coughs and winterills will become a thing of the past. Complete outfit lasts two months, price \$1.00, smaller size 50c, sample size 25c, all dealers or the Catarrhozone Co., Montreal.

Encouraging Pig Clubs

Pure-Bred Registered Berkshire Pigs Distributed Amongst School Children

Seventy-two pure-bred registered Berkshire sow pigs were distributed at Brooks and Basmato to thirty-six boys and girls, members of the pig clubs at these points. The pigs cost \$20 each delivered, and the purchasers were financed by the local banks, which loaned approved members \$40 on their notes. These pigs will all be taken care of and fed by the members themselves, who will exhibit them at the school fair.

CATARRAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATHARTIC MEDICINE relieves the causes of catarrhal deafness, the mucous lining of the Eustachian tube, and restores the hearing. If you have a running nose or impaired hearing, this medicine will cure you. Deafness is the result. Unless the inflammation can be reduced, the hearing can be destroyed forever. HALL'S CATHARTIC MEDICINE restores the blood on the mucous surfaces of the system, thus removing the inflammation and assisting Nature in restoring normal conditions.

Circulars free. All Druggists, F. J. Cheney & Co., Toledo, Ohio.

Afro-American Banks

Sixty-Nine in States With Resources of \$12,000,000

There are sixty-nine negro banks in the United States, with combined resources estimated at \$12,000,000. Sixty-one are in the south. There are twenty-five negro insurance companies in the United States, with assets aggregating \$5,339,195.20. Twenty-one are in the south. Negro banks have enjoyed a longer existence than negro insurance companies. The first bank of its kind was opened in the early eighties. Twenty-five years ago insurance companies owned and operated by Afro-Americans were practically unknown. Virginia is known as the home of the first negro bank.

Perpetual Motion Clock

This Clock Runs 10 Years Before It is Wound

A demonstration of a clock which goes for 10 years without winding was given at the offices of the British Horo-Electric, Limited, in Kingsway. The clock, which is called the "Bulle," is worked by electricity, and requires no special installation. The controlling principle is electro-magnetism. The current is drawn from a battery inclosed in a brass cylinder. The battery drives the pendulum, and the pendulum in turn acts as a motor and dynamo, and generates the required current. Just sufficient current is used to keep the battery alive. Even at the end of 10 years winding is unnecessary. If the battery is renewed after that time the clock will go on until the end of the world, or, at least, until the mechanism "busts."

Have You Stomach Risings,
Gas, Heart Burn, Sourness?
Tells of a Simply Remedy

It's really wonderful the quick relief you get from ten or twenty drops of Nervilleine taken in sweetened water. For cramps and spasms, Nervilleine is equally efficient. To safeguard yourself against these ailments, keep handy on the shelf a bottle of trusty old Nervilleine. It will relieve the minor aches and pains of the whole family. Good for internal or external use. 35c at all dealers.

Exhibits From Brooks

Superiority of District Shown by Requests for Exhibition Samples

For many years the superiority of the Brooks district has been acknowledged by requests to furnish exhibition samples of bundles of alfalfa, clover, vetches, peas, timothy, bromus, grass, western vey, grains and grass seeds, and contracts have again been let to many local farmers, both by the Dominion and Provincial Governments, for several carloads of exhibition bundles of agricultural products. These are to be distributed through out the United States and Europe.

BABY'S GREAT DANGER
DURING HOT WEATHER

More little ones die during the hot weather than at any other time of the year. Diarrhoea, dysentery, cholera infantum and stomach troubles come, with their warning, and when a medicine is not at hand to give promptly the short delay too frequently means death. The child has passed beyond aid. Baby's Own Tablets should always be kept in the house where there are young children. An occasional dose of the Tablets will prevent stomach and bowel troubles, or if the trouble suddenly the prompt use of the Tablets will relieve the baby. The Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discoveries Made at South Pole

Crew of Quest Found Gigantic Forests Under the Sea

There is a wonderful diamond mine in the Antarctic regions. This statement was made by members of the Shackleton-Bowett Expedition. On a small island near South Georgia, on the fringe of the great icefields which guard the South Pole, soil was discovered which the Quest's mineralogist declared to be the type that carries diamonds.

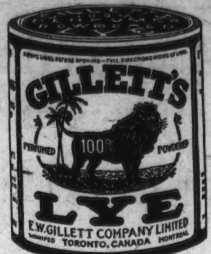

The expedition also discovered yellow quartz, and it is expected that an attempt will be made by a South African company to locate the diamond mine.

This is only one of the many discoveries made by members of the expedition. Gigantic forests were discovered under the sea, and vast new fishing grounds were located. The Antarctic waters are swarming with edible fish, and present a new outlet for the fishing industry. In fact, the fish are so plentiful that the expedition never needed to use bait of any description!

Extensive soundings were taken, and the greatest depth recorded was 2,760 fathoms.

It is held by scientists that a human being cannot live without a brain, which only goes to prove how mistaken scientists can be occasionally.

Minard's Liniment Lumberman's Friend

Locomotive From Scrap Iron

Mechanical Genius of Buenos Ayres Completes Miniature Train

Working for eleven years, with a file as his only tool, a man in Buenos Ayres has made a miniature locomotive of scrap iron. The locomotive can be operated under its own power by the use of compressed air. The iron was not heated in the making but was worked cold. A small coal tender and passenger coach were made at the same time and the whole thing is a little more than six feet in length and weighs 170 pounds. More than 1,300 screws and 2,000 rivets were used in the work. The train is complete to the last tiny detail and is built on the model of the equipment used on the British railroads of that country.

For years I have never considered my stock of household remedies complete until I bought a bottle of Minard's Liniment. For burns, scalds, insect bites, and all sorts of skin troubles, it is a real gem. It is so simple to use, and so effective, that it will give more immediate relief than any other remedy I have ever used. It is a real gem.

It is so simple to use, and so effective, that it will give more immediate relief than any other remedy I have ever used. It is a real gem. It is so simple to use, and so effective, that it will give more immediate relief than any other remedy I have ever used. It is a real gem.

Different Set

"Have you called on the new neighbors yet?" "No, they're hardly our kind, my dear. They are the sort of people who never do anything they can't afford."—Boston Transcript.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

For a Practical Test

The President—You told your class that a family of four could live well on \$718 a year. Are you sure of that? The Professor of Domestic Economy—Absolutely. Reliable statistics prove it.

The President—I'm glad to hear it because we are cutting your salary 40 per cent. for the coming year. New York Globe.

YOUNG WOMEN
WHO SUFFER

Letter Points Way Towards Relief—Lydia E. Pinkham's Vegetable Compound

Toronto, Ontario—"I suffered from the time I was a school-girl until I had taken your medicine with pain in my left side and with cramps, growing worse each year until I was all run down. I was so bad at times that I was unfit for work. I tried several doctors and patent medicines and was only relieved for a short time. Some of the doctors wanted to have an operation but my father objected. Finally I learned through my mother of Lydia E. Pinkham's Vegetable Compound and how thankful I am that I tried it. I am relieved from pain and cramps and feel as if it has saved my life. You may use my letter to help any woman who is unable to recommend the medicine."—Mrs. H. A. Goodwin, 14 Rockvale Ave., Toronto, Ontario.

Lydia E. Pinkham's Private Text-Book upon "Allments Peculiar to Women" will be sent to you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. This book contains valuable information.

Taste the joy of living!

THERE is no greater joy than perfect health—the heritage of those who obey the simple laws of Nature.

Drugs are useful in case of sickness, but Nature strongly objects to their continued use by normal, healthy persons.

Caffeine, the alkaloid in tea and coffee, is a slow but powerful drug. In the hands of a doctor, it is useful and beneficial. But taken regularly, as a daily stimulant, it often upsets the nerves, causing serious organic troubles.

Thousands have found health and satisfaction in Instant Postum—the healthful, wholesome cereal beverage made from roasted wheat. It is fragrant—delicious—satisfying—and safe.

Holborn News.

Mr. Thomas Scott made a
 business trip to Stony on
 Saturday.

Mr. Bignell of Edmonton
 purchased several head of
 cattle thru Holborn District
 this week, shipping Tuesday
 to the City.

Several of the young ladies
 are taking great pleasure in
 horseback riding and bobbing
 their hair.

School opened on Monday,
 with Miss Hansen at the
 helm. The summer holidays
 are over for the little tots,
 and we trust that they have
 been pleasant days to them
 all, and that they may go at
 their lessons with as much
 pleasure.

U F W A dance and whist
 drive at Holborn-schoolhouse
 Sept. 4. Everybody welcome.
 Ladies please bring cake.
 Radio music is expected.

Miss Hansen spent the

week end in the City.

Harvest is general this
 week, and some crops are
 stacking up better than was
 at one time expected.

The telephone extensions
 are now complete, and if you
 want the news, why, get on
 the line.

U F A Holborn Local No.
 250 held their regular meet-
 ing Tuesday, Aug. 22. The
 U F W A paid a visit, and,
 to the surprise of the U F A,
 members, gave them a treat
 to lemonade and cake.

Mr and Mrs J. A Duval
 motored to Stony on Mon-
 day.

 Orders taken for Wall Paper.
 New sample books to be seen at the
 new restaurant, first door north of
 Kelly's Store.

Stony Plain and District

A meeting of the Rattle Club will
 be held Saturday evening, Sept. 2.

Mr J B McEachern left yester-
 day to spend his vacation with
 his sister at Lacombe.

The A. P. Police will open their
 local detachment quarters on Sat-
 urday next.

Mr. Frevel, from B. C., is the
 new night agent at the G. T. Ry.

Mr Smith left Monday for Gain-
 ford, and will be missed by his
 many friends here.

Schadeck & Barth have secured
 the contract for installing a fur-
 nace in the Kelly Building.

Mr Campbell was appointed the
 new janitor for the local school
 at the last meeting of the school
 board.

Brox and Zucht held a very
 successful auction sale on Saturday
 afternoon last, in Stony Plain.

The U. F. A. local holds its reg-
 ular meeting next Saturday even-
 ing at the Royal Hotel.

Mr. Hollingshead, has taken
 charge of classes formerly taught
 by Miss Lalonde, at the local
 school.

Dance, Ducholke's Hall, Friday,
 Sept. 1. Edmonton Orchestra.

The open season for shooting
 ducks commences tomorrow, Sept.
 1st. The shooting season for prairie
 chicken does not open till
 October 15.

The Phone extensions will reach
 Mr. Chas Witherspoon's Farm,
 when completed.

An officer from the militia De-
 partment will inspect the range
 and rifles at Comet this week.

Keep your money circulating in
 your home district.

Duffield Stampede, Monday and
 Tuesday next, Sept. 4 and 5.

His Excellency, Lord Byng and
 party arrived at Jasper Park Sat-
 urday evening last. They are on
 a sight seeing trip, and will leave
 for Edmonton on Monday, Sept.
 11. A four-day stay will be made
 in that City, and the Civic author-
 ities are arranging for a two day
 celebration, in His Excellency's
 honour.

WANTED—Girl wanted, for gen-
 eral housework. Apply Mrs L
 Wight, Stony Plain.

S. P. Centre's New Trustees.
 Stony Plain Centre's new
 School Board held its inaug-
 ural meeting last week, and
 elected as the new trustees
 Messrs Jacob Ulmer, Jacob
 Schoep, and John Ducholke.
 The latter is chairman, with
 Mr Ulmer as secretary. It
 was arranged to begin opera-
 tions on the new schoolhouse
 as soon as negotiations with
 the Department of Education
 are completed. Another meet-
 ing of the trustees will short-
 ly be held, to call for ten-
 ders.
